

**Med-Systems Inc. New SinuCleanse® NetiCap
August 2011**

Med-Systems Inc. introduced an on-the-go nasal wash product to its existing SinuCleanse® nasal washing line. The SinuCleanse® NetiCap is a twist-on cap that can turn most water bottles into an instant neti pot. The NetiCap is available in a package of two and includes instructions for use and 10 all-natural pharmaceutical-grade saline packets.

SinuCleanse® saline packets are some of the only products in the nasal washing category that are made in the United States and adhere to the Federal Drug Administration's (FDA) Pharmaceutical Good Manufacturing Practices. The products are an all-natural way to immediately relieve congestion and sinus symptoms without drug interactions or drug side effects. All SinuCleanse® products are unbreakable and dishwasher-safe to ensure safety and cleanliness.
